

AI Resume Screening Report

Candidate Name: Ethan Matthew D'Souza

Email: ethan.dsouza.dev@gmail.com

Phone: +91 98765 81425

Scores

ATS Score: 85%

JD Match Score: 82%

Skills

- Python
- FastAPI
- Django
- Flask
- PostgreSQL
- MySQL
- MongoDB
- Redis
- REST APIs
- JWT
- OAuth2
- Docker
- Kubernetes
- AWS
- Git
- GitHub Actions

Education

B.E. Computer Science, M.S. Ramaiah Institute of Technology (2017-2021), CGPA: 8.74/10

Experience

Python Backend Developer - FinEdge Technologies Pvt. Ltd. (Jun 2023-Present)

Projects

Digital Loan Processing Platform, Real-Time Payment Gateway API, Fraud Detection Backend Service, Customer KYC Automation System

Strengths

- Strong backend development foundation with modern frameworks like FastAPI and Django.
- Proven experience in API optimization and scalable microservices architecture.
- Demonstrated knowledge of containerization and cloud platforms (AWS, Docker, Kubernetes).
- High academic performance with an 8.74/10 CGPA in Computer Science.

Weaknesses

- Lacks hands-on experience with core machine learning libraries like PyTorch or TensorFlow.
- Resume details only one professional employer, leaving a gap in full career timeline detail.
- No explicit mention of automated testing tools like PyTest or Unittest.
- No mention of data manipulation tools such as Pandas or NumPy.

Suggestions

- Incorporate basic machine learning projects if applying to hybrid software/AI roles.
- Clarify details of previous experiences to substantiate the stated 3+ years of total experience.
- Highlight test coverage and test automation tools utilized in backend workflows.
- Add links to public portfolios or GitHub repositories to showcase code quality.

Interview Questions

Easy | HR

Can you walk us through your backend development experience and explain what motivates you to work with modern Python frameworks?

Easy | Technical

What is the difference between SQL and NoSQL databases, and how did you decide between PostgreSQL and MongoDB in your projects?

Medium | Coding

Write a custom Python decorator that logs the runtime of any given FastAPI endpoint.

Medium | Technical

How did you use Redis to optimize backend performance, and what strategy did you use for cache invalidation?

Medium | Project

Could you describe the architecture of your Digital Loan Processing Platform and how you secured user endpoints?

Hard | Technical

Explain the difference between JWT and OAuth2, and how you would design a secure authentication service for distributed microservices.

Hard | Coding

How would you design and implement a distributed rate limiter using Redis and Python to prevent API abuse?

Hard | Project

You achieved a 42% API performance optimization at FinEdge. Walk me through the exact profiling steps, the bottlenecks identified, and how you solved them.
